

**Exercice d'anatomie en coupe – Région abdo-pelvienne (digestif)**

Identifier les structures anatomiques suivantes.

\* Les images suivantes proviennent du site internet : <https://eanatomy-rimouski.proxy.collecto.ca/fr/e-Anatomy>

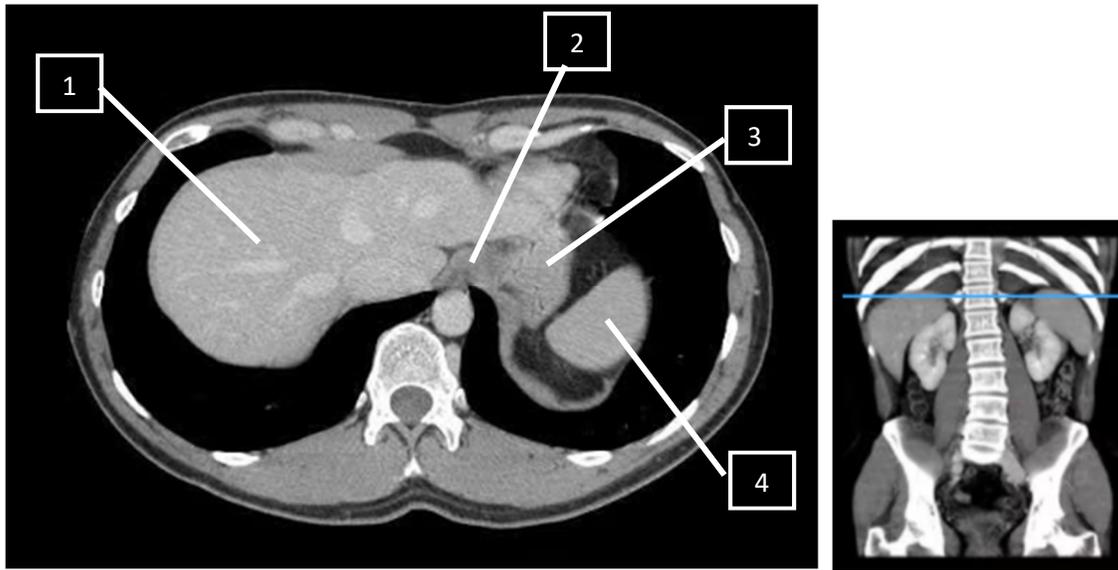

**Image 1**

1: Œsophage

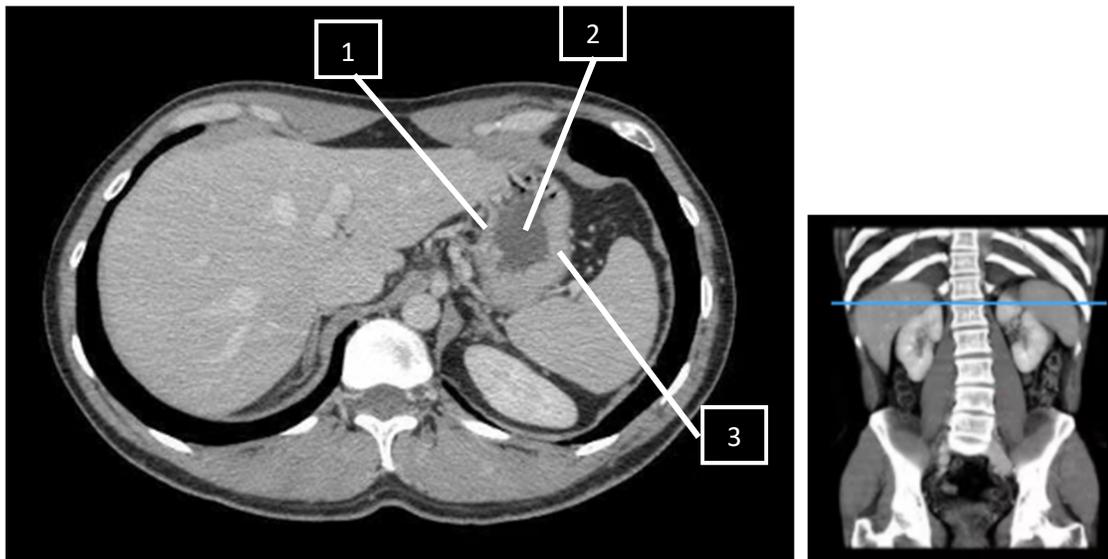

2: Aorte thoracique

Image 2

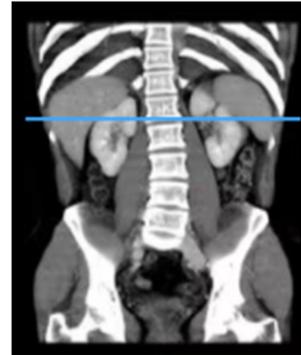

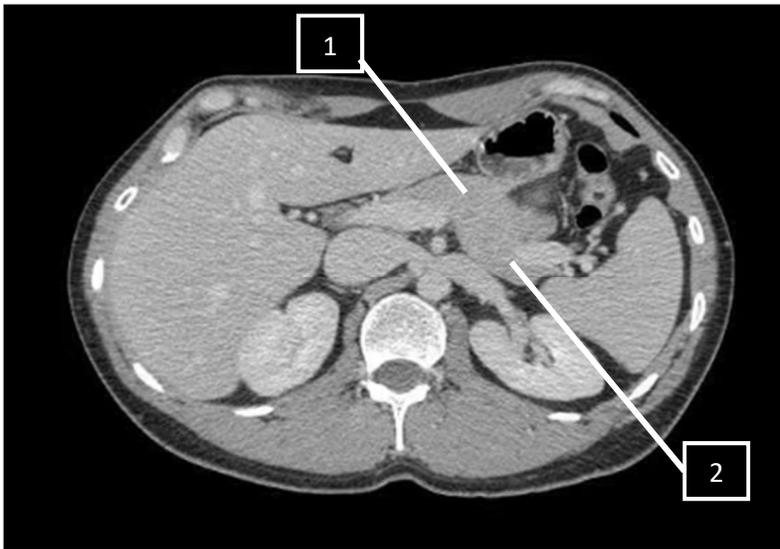

- 1: Foie
- 2: Cardia
- 3: Fondus de l'estomac
- 4: Rate

Image 3

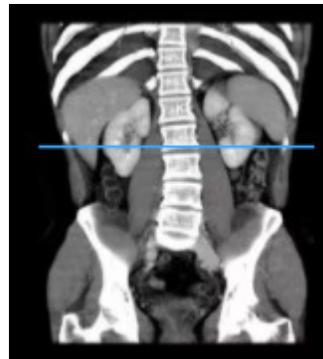

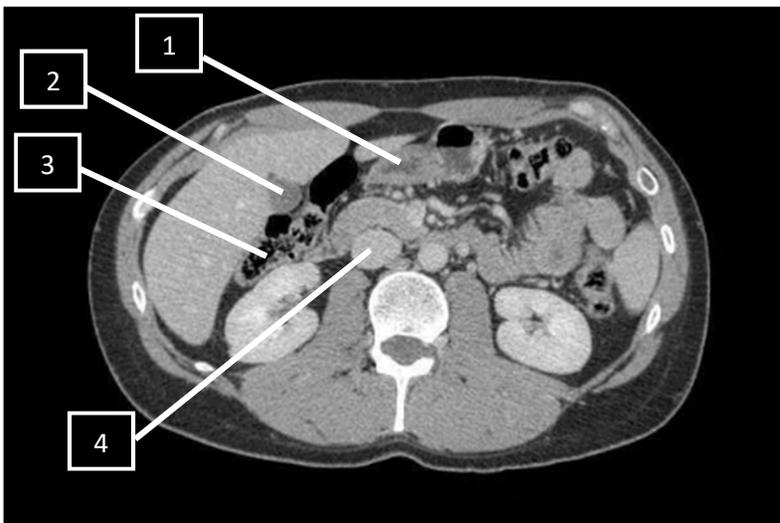

- 1: Petite courbure de l'estomac
- 2: Corps de l'estomac
- 3: Grande courbure de l'estomac

Image 4

- 1: Corps du pancréas
- 2: Queue du pancréas

Image 5

- 1: Pylore
- 2: Vésicule biliaire
- 3: Angle colique hépatique (angle colique droit)
- 4: Veine cave inférieure

Image 6

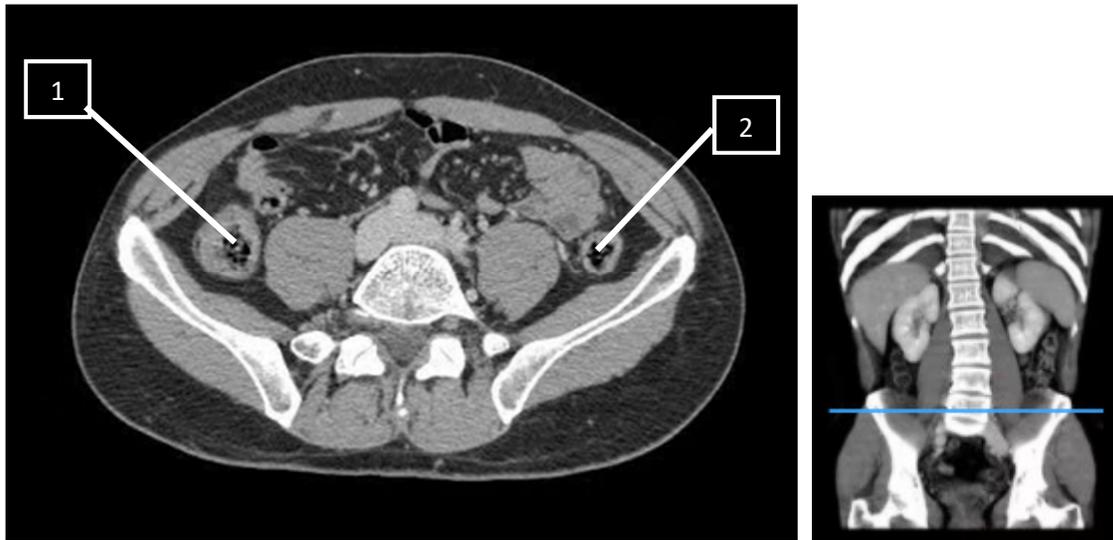

- 1: Côlon transverse
- 2: Côlon ascendant
- 3: Aorte abdominale
- 4: Côlon descendant

Image 7

- 1: Veine cave inférieure
- 2: Iléon

Image 8

1: Caecum

2: Côlon descendant

Image 9

1: Côlon sigmoïde

Image 10

1: Tête femoral droite

2: Rectum

3: Acetabulum gauche
